ABSTRACT

This study of foreign language enrollments in secondary schools quantitatively demonstrates the impact of the National Defense Education Act of 1958 on foreign language study through some 50 tables and charts. Ninth in the Modern Language Association of America (MLA) series, the report covers: (1) public secondary schools, (2) foreign languages, (3) Spanish, (4) French, (5) German, (6) Russian, (7) Italian, (8) Latin, (9) other languages, and (10) non-public secondary schools. While concentrating primarily on enrollments in fall 1968, the study presents comparative data from earlier reports, particularly the last, made in 1965. A summary table, sample questionnaire, and discussion of the organization of tables are included. (RL)

1968	12,721,352	3,518,413	27.7	1,698,034	13.3	1,320,100	10.4	423,196	3.3	24,318	.2	26,920	.2	371,977	2.9

Note: 1. All foreign language enrollments from 1890 through 1948 are estimated from percents of the languages in the total high school enrollments given by William R. Parker, The National Interest and Foreign Languages, U.S. National Commission for the United Nations Educational, Scientific, and Cultural Organization, 1957, pp. 52-53.

The statistics from 1958 to 1965 are all taken from MLA reports. (See introduction for list of these reports.)

2. The totals of the modern foreign languages (columns 5, 7, 9, 11) do not equal the MFL enrollment totals in column 3, since the column 3 figures include a small number of enrollments for "Other Languages." (See page 52 TABLE 9-A, for a summary of "Other Languages" enrollments from 1958 to 1968.)

FOREWORD

The staff members who compiled this report acknowledge with gratitude the cooperation of state FL supervisors and consultants, high school principals, and others who supplied the data upon which it is based (for detailed list of contributors, see following pages). They also express their thanks to Hans Rutimann, Director of MLA Computer Operations, for his assistance in statistical calculations and analysis.

We wish to record once more our gratitude to Mrs. Julia A. Petrov of the Office of Education, whose zeal and special knowledge proved helpful at every stage of the project. We acknowledge with thanks the splendid cooperation of the registrars who supplied the data upon which the report is based.

Glen D. Willbern
Director of Statistical Studies

Wisconsin	Mr. Frank M. Grittner, Foreign Language Supervisor
Wyoming	Mr. Paul O. Soumokil, Foreign Language Consultant

INTRODUCTION

This study of foreign language enrollments in public secondary schools is the ninth in a series that has been published by the Modern Language Association since 1958.[1] Taken collectively, these reports demonstrate the impact of the National Defense Education Act of 1958 on foreign language study and provide a quantitative measure of the progress made by FL study in the nation's high schools during the last decade. The present study deals primarily with enrollments in fall 1968, but it also presents comparative data from earlier reports, particularly from 1965, the date of the last previous study.

In fall 1968, the public secondary schools (PSS) in the 7-12 grade range[2] reported a record foreign language (FL) enrollment of over 4.75 million, comprising 27.1 percent of the total PSS enrollment of 17.5 million students. Eight years earlier, in 1960, 2.8 FL enrollments were reported from the PSS population of 11.8 million. While the PSS population increased by about 50 percent in eight years, the FL enrollment grew by approximately 70 percent.

part of a secondary school system. More than 70 percent of U.S. public school 7th and 8th grades were considered "secondary" in 1968. The USOE notes that "because public and secondary education is a State and local responsibility, any statistical totals for the Nation as a whole will necessarily be a composite of the heterogeneous educational practices existing in the United States." In short, the distinction between data labeled "9-12" and that labeled "7-12" is not completely clear-cut. In view of the increasing volume of FL study in junior high schools, however, it would be unrealistic to ignore 7th and 8th grade figures altogether, even though the sources that supply the data may not always make a rigid distinction between elementary and secondary 7th and 8th grade enrollments.

Distribution of the FL Enrollment

In fall 1968, the five leading modern foreign languages (MFLs)—Spanish, French, German, Russian, and Italian—accounted for 91.7 percent of the total language enrollment in grades 7-12, Latin for just over 8 percent, and "other" languages, about a dozen all told, for less than one-half of one percent.

Chart A supplies a comparison of FL enrollments in 1965, the date of the last previous report, and in 1968. Column 2 gives the national totals, columns 3-10 give a breakdown by region. New England continues to lead in proportion of PSS population enrolled in FL, with 43.6 percent. The Mideast follows, with a percentage of 39.9, followed by the Far West, with 32.4. The Southeast and Southwest both fall short of 20 percent.

Nationally, FL enrollment as a percentage of PSS population in grades 7-12 fell from 27.4 in 1965 to 27.1 in 1968, reversing a trend that had continued unbroken from 1960 to 1965 (the 1960 percentage was 23.4).

Almost half (48.5%) of the high school students of MFLs are studying Spanish (in 1960, the proportion was exactly half). French is in second place, with 38.7 percent of the total MFL enrollment, and German is third, with 10.9 percent.

Latin attracted approximately 400,000 students in 1968, but the share of Latin in the total FL enrollment dropped from one in seven in 1965 to one in twelve in 1968. Italian and Russian enrolled approximately 33,000 and 29,000, respectively.

A dozen "other" languages are taught in secondary schools, all with negligible enrollments even though the total has doubled since 1965; there may be still others hidden in the unspecified "other" langages reported, (see Table 9-A). Japanese is now in the lead in this group, with 4824 students, having displaced Hebrew, which is now second, with 4491. Portuguese is in third place, with 2265, and Chinese is fourth, with 2096. African languages have begun to show up; 534 enrollments were reported for Swahili, 248 in Xhosa, and 93 reported only as "African." American Indian language study is not quite extinct--19 students of Navajo were reported.

Chart B, reprinted from the 1965 Report, shows the enrollment pattern in advanced courses as reported annually from 1961 to 1965. After a break of three years when no data were compiled, the figures for fall 1968 show the following:

CHART B
COMPARISON OF ENROLLMENTS IN COURSES III AND IV IN THE SIX LEADING FOREIGN LANGUAGES, GRADES 7-12: 1961, 1962, 1963, 1964 AND 1965

	1961		1962		1963		1964		1965		Percent of Increase 1961-65

Spanish, 185,682 in Course Level III and 58,131 in Level 4; in French, 201,327 in Level III, 72,077 in Level IV; German, 49,770 in III; 18,106 in IV; Russian, 3,138 in III, 1,400 in IV; Italian 3,567 in III, 665 in IV; Latin, 29,678 in III, 11,508 in IV.

The summary table (inside front cover) constitutes a capsule history of foreign language study in the 9-12 grade span of U.S. high schools over the past 78 years. In 1890, one high school student in three was enrolled in Latin, and one in six was studying either German or French. By the turn of the century, the proportion of high school students enrolled in Latin had risen to half, and in German or French, to a fifth. In 1910, Spanish made its appearance in the high school curriculum, with an enrollment of less than one percent of the school population.

Following World War I there was a dramatic shift in the balance among the languages. German, formerly the leading modern foreign language, all but disappeared from the course of study, and French became the leader. In 1922, French enrolled 15.5 percent of the high school population, Spanish followed with 11.3, and German was in last place, with less than one percent. Latin, with 27.5 percent of the high school population, almost exactly equalled the combined modern language enrollment.

The 1930's and 1940's saw a general decline in foreign language study. By 1948, only one-fifth of the high school population was enrolled in any foreign language. Spanish had emerged as the leading modern foreign language, with 8.2 percent of the high school population; French, which had not yet recovered from the catastrophic drop it suffered in World War II, had less than 5 percent.

Beginning in 1958, the picture in modern language has brightened year by year. German inched up from 1.2 percent of the high school population in 1958 to 3.3 in 1968; in the same period, French increased from 6.1 to 10.4 and Spanish from 8.8 to 13.4. Russian and Italian each continue to account for about one-fifth of one percent of the population enrollment. Latin enrollment has declined, and now stands at just under three percent of the high school population. The percentage of high school students enrolled in all foreign languages increased from 24.2 in 1958 to 30.6 in 1968.

TABLE 9-A	Enrollments in Languages Other Than Spanish, French, German, Russian, Italian, and Latin, by State, with Breakdown by Courses: Fall 1968	52

SPECIAL EXPLANATIONS

In the tables that follow, language enrollment data comparing 1965 to 1968 figures are first given for grades 7-12. Succeeding tables give the same information broken down by grades 7-8 and 9-12.

The B Tables for each language and Table 2-D show a comparison in enrollments between 1965 and 1968 for the secondary grades 7-12, and give the percent of change in the enrollment over the three-year span. An additional column gives the percent of change in the total PSS student enrollment over the same period of time, for comparison with the language-enrollment changes. This high-school population increase was obtained from enrollment figures published by the U.S. Office of Education, "Fall 1965 Statistics of Public Schools", and "Fall 1968 Statistics of Public Schools."

The following abbreviations have been used in the text, charts, and tables of this report:

Cl. Lang.	Classical language.
FL(s)	foreign language(s), i.e., modern foreign languages plus Latin and Greek.
MFL(s)	modern foreign language(s).
PSS	public secondary school(s).

"General," "exploratory," and "after-school" courses were not included in the tabulation of enrollments.

A course is considered to be one full year of foreign-language study on the secondary level counted as a unit of credit toward graduation.

Percents have been rounded off to the nearest tenth except where they do not reflect distinctions unless carried to the hundredth place.

STATISTICAL TABLES

Tables of data for the individual languages are organized by the following system: The numerals 3 through 8 designate the languages—Spanish, French, German, Russian, Italian, and Latin, in that order—and the letters A through G designate the seven tables into which the data for each language are organized. The pattern is consistent, so that comparisons between languages are easy to make. Table 3-A, for example, shows Spanish enrollments in grades 7-12 for fall 1968, by state, with breakdown by course; Table 4-A gives the corresponding information for French, 5-A for German, and so on. Table 9-A is devoted to enrollments in languages other than the six with the largest enrollments.

Finally, the summary table, which is placed inside the front cover for easy reference, gives a succinct history of foreign language study in the public high schools (grades 9-12) of the United States from 1890 to the present data.

1/ 1967 data.
2/ Includes Course I, 708 grade enrollments; no breakdown available.
3/ No 7-8 grade data available.
4/ Course VII.
5/ Spanish Course VI includes 22 classified as Course VII and II classified as advance placement by the Utah Board of Ed.
6/ Spanish total for Maine includes 22 enrollments for which the course level is unidentified.
7/ Spanish total for New York includes 4,077 enrollments for which the course level is unidentified.
8/ No breakdown for 2,866 enrollments, grades 9-12, for South Dakota.
9/ USA totals include 6,965 enrollments for which the course level is unidentified.

1/ 1967 data.
2/ Includes Course I, 7-8 grade enrollments; no breakdown available.
3/ No 7-8 grade data available.
4/ Course VI includes 24 enrollments in Course VII.
5/ French Course VI includes 42 classified as Course VII by the Utah Board of Education.
6/ French total for Maine includes 422 enrollments for which the course level is unidentified.
7/ French total for New York includes 5,240 enrollments for which the course level is unidentified.
8/ No breakdown for 1,876 enrollments, grades 9-12, for South Dakota.
9/ USA totals include 7,538 enrollments for which the course level is unidentified

1/ 1967 data.
2/ Includes Course I, 7-8 grade enrollments; no breakdown available.
3/ No 7-8 grade data available.
4/ German total for Maine includes 25 enrollments for which the course level is unidentified.
5/ German total for New York includes 240 enrollments for which the course level is unidentified.
6/ No breakdown available for 3,369 enrollments, grades 9-12 for South Dakota.
7/ USA totals includd 3,634 enrollments for which the course level is unidentified.

[1] 1967 data.
[2] Includes Course I 7-8 grade enrollments; no breakdown available.
[3] No 7-8 grade data available.
[4] Some level IV enrollments included in level III.
[5] Latin total for Maine includes 41 enrollments for which the course level is unidentified.
[6] Latin total for New York includes 538 enrollments for which the course level is unidentified.
[7] No breakdown for 752 enrollments, grades 9-12, for South Dakota.
[8] USA totals include 1,331 enrollments for which course level is unidentified.

NONPUBLIC SECONDARY SCHOOLS

In fall 1968, for the first time since 1962, the Modern Language Association made a survey, using sampling techniques, for the purpose of obtaining national estimates of foreign language enrollment in nonpublic secondary schools. A sample of 553 was generated from the NEA's 1964-65 tape of 3,317 nonpublic secondary schools.

The universe of inquiry was stratified by seven enrollment sizes; within each stratum, a random sample was selected.

Questionnaires were sent to all the schools in the sample. Two follow-up letters were sent to schools that failed to reply to previous requests. Finally, an effort was made to reach by telephone all those schools that had not responded to any of the written requests. Eventually, information was received from all schools except those that were not listed in local telephone directories. Most of the schools that could not be reached (29) were small; their total enrollment was estimated at 9,100.

The following summary gives an analysis of the returns.

No. of schools in the universe		3,317	
No. of schools in the sample		553	
Returns indicating that school was discontinued	18		
Returns from elementary and other non-secondary schools in the sample	21		
Total of closed and misclassified schools		39	(7.0%)
Total usable returns		485	(87.7%)
Total for which no information was found		29	(5.3%)

In the following tabulations and discussions, all enrollment estimates are rounded to the nearest hundred. Figures for 1962 are taken from Eshelman and Lian, "FL Offerings and Enrollments in Secondary Schools--Public Schools, Fall 1961, Fall 1962, and Nonpublic Schools, Fall 1962." (This study was performed by the Modern Language Association for the U.S. Office of Education, and published by the MLA in 1962.)

Nonpublic Secondary School Enrollment		No. of Students Enrolled in FL		% of Students Enrolled in FL	
Fall 1962	Fall 1968	Fall 1962	Fall 1968	1962	1968
1,190,200	1,185,200	904,600	694,700	76.0	58.6

According to the above figures, the total enrollment has remained virtually stationary over the six-year period, but the proportion of students engaged in foreign language study has declined sharply. The following tabulation compares the distribution of FL enrollment in 1962 and 1968.

Language	Number of Students Enrolled		% of Total School Enrollment	
	Fall 1962	Fall 1968	Fall 1962	Fall 1968
Latin	414,200	158,900	34.8	13.4
French	268,000	248,500	22.5	21.0
Spanish	171,200	240,600	14.4	20.3
German	29,400	36,500	2.5	3.1
Other Languages	21,800	10,300	1.8	0.8

Latin has suffered a considerable enrollment loss in the past six years and has lost its place as the leading language in nonpublic schools. French is now in first place, though Spanish is not far behind.

"Other Languages" are not listed separately because the totals are too small to permit valid estimates. The languages reported in this group in 1968 were Italian, Russian, Ancient Greek, Polish, Chinese, Hebrew, and Slovak.

The public school survey for fall 1968 indicated that 37.1% of the students enrolled in public secondary schools (grades 7-12) were studying foreign languages. (For further details, see Table 2-A, p. 4.)

The following tabulation shows enrollments by level of instruction for Latin and the three leading modern languages. These estimates are presented with the caution that the small frequencies are susceptible to considerable sampling error.

Language	Enrollments by Level of Instruction, Fall 1968				
	Level I	Level II	Level III	Level IV	Levels V & VI
Latin	77,100	62,400	13,300	6,100	100
French	101,200	85,500	42,800	16,200	2,800
Spanish	118,500	86,900	27,600	7,300	200
German	18,500	13,300	3,600	1,100	Under 100

SURVEY OF FOREIGN LANGUAGE ENROLLMENTS IN PUBLIC AND NONPUBLIC SECONDARY SCHOOLS, FALL 1968

Conducted under contract with NDEA Title VI Funds for the Office of Education
United States Department of Health, Education, and Welfare

I. INFORMATION NEEDED FROM ALL SCHOOLS RECEIVING THIS FORM

As of Fall 1968, does your school have any students enrolled in foreign language?

Yes ☐ No ☐

If your answer is *no*, please fill in *the first page* of this questionnaire and return it in the enclosed envelope.

If your answer is *yes*, please complete *both sides* of this questionnaire and return in the enclosed envelope.

Note: It is important that schools that do *not* teach foreign languages, as well as schools that do, Complete the first page of this questionnaire.

A.

PERSON COMPLETING THIS REPORT:			TITLE:
Last name	First	Middle	
TELEPHONE			DATE
Area code	Number	Extension	

B. Check the classification of your school and complete blanks to indicate what grades your school comprises.

1. Junior High School – – – – – – – – – – – –	☐	Grades _____ through _____
2. Junior-Senior High School – – – – – – – – – –	☐	Grades _____ through _____
3. Intermediate School – – – – – – – – – – – –	☐	Grades _____ through _____
4. Senior High School – – – – – – – – – – – –	☐	Grades _____ through _____
5. Other (Specify) _____	☐	Grades _____ through _____

C. Please indicate the total enrollment of your school in Fall 1968.

☐
(total enrollment)

SCHOOLS OFFERING FOREIGN LANGUAGE INSTRUCTION SHOULD PLEASE COMPLETE THE OTHER SIDE OF THIS QUESTIONNAIRE AS WELL

II. ADDITIONAL INFORMATION NEEDED FROM SCHOOLS OFFERING FOREIGN LANGUAGE INSTRUCTION

This survey covers secondary school students who were enrolled in foreign language courses at the beginning of the fall term in 1968 and who, upon successful completion of those courses, will have earned credits toward graduation from either Junior High School, Intermediate School, or Senior High School.

A. *7th and 8th grade foreign language enrollments*

Report the number of 7th and 8th grade foreign language students in secondary school systems. Do *not* report 7th and 8th grade students who are in elementary schools.

	7th Graders	8th Graders
LATIN		
FRENCH		
SPANISH		
GERMAN		
RUSSIAN		
ITALIAN		
OTHER (Specify)		
OTHER (Specify)		

B. *Reporting 9th through 12th grade language enrollments*

Report language enrollments for students in the 9th, 10th, 11th, and 12th grades by language course level rather than by grade level of the students pursuing the courses. For instance, Course II, the second year of language study, might be composed of 9th graders, 10th graders, and 11th graders, some of whom may have begun studying the language prior to entering the 9th grade. In such a case, the total of the 9th, 10th, and 11th graders enrolled in the so called "second year" of study of a language should be entered in the column designated "Course II." (Clearly, Courses V and VI would usually apply only to students who had begun study of the language prior to the 9th grade.)

Enter the number of 9th through 12th graders enrolled in each course. A course is defined as a year of study which grants the student credit toward graduation from Junior High School, Intermediate School, or Senior High School.

ENTER ONLY STUDENTS IN GRADES 9 THROUGH 12

	COURSE I (first year studying the language)	COURSE II (second year)	COURSE III (third year)	COURSE IV (fourth year)	COURSE V (fifth year)	COURSE VI (sixth year)
